SUPPLEMENT TO  
REPORT NO.

25X1X

1. The construction of the foundry at the Prvomajska Factory in Zagreb (Zitnjak) has been halted. The construction enterprise which was in charge of the work is removing the scaffolding and transferring it to other construction sites.
2. All traffic has been halted on the newly built railroad siding which serves the Prvomajska Factory and the Boiler Factory (Fabrika Parnih Kotlova). This was done by order of the Government Railroad Directorate in Zagreb, on account of the poor quality of the new siding.
3. Work on the construction of the mechanical workshop of the Jedinstvo factory in Zagreb was halted because of erroneous calculations made in erecting the roof. A special committee of experts from the Croatian Ministry of Construction was sent to investigate the matter, discovered the faults, and forbade further work. There is a possibility that because of this situation, the building may be torn down. Workers have been forbidden to walk about in the construction area. The Architectural Planning Institute in Zagreb has been made responsible for the solution of this problem.
